

VIEW™: An Assessment of Problem Solving Style

VIEW™ is a concise, easy to understand, scientifically sound inventory for assessing problem-solving style. It has been used effectively with thousands of managers, educators, students, and church leaders from a variety of contexts for a variety of purposes. Consultants, group facilitators, team leaders and trainers from many countries around the world use VIEW™ .

VIEW™ is used to help people identify their personal problem-solving style preferences and to understand how to use these preferences constructively when they are solving problems or dealing with change.

VIEW™ provides valuable information for individual awareness, team-building experiences, individual and team problem-solving, team selection and other advisement, training, consulting and leadership development purposes. VIEW™ can be used effectively with individuals or groups.

VIEW™ is not:

A generic style or type measure
 Designed to replace other cognitive style, learning style or personality assessment tools

VIEW™ is:

A specific assessment tool
 Designed to help understand individual approaches to change and problem solving

eclecthink international's VIEW™ services include:

- ◆ Online completion of the inventory
- ◆ Personalized individual reports
- ◆ Face-to-face, individual or group feedback sessions of up to 1 hour
